

## Cumberland and Westmorland, 1949, Norman Nicholson

The Cross book mainly of Lower Palaeozoic rocks and is situated on the eastern side of the Vale of Eden. It was first described in detail by Nicholson and Marr (1891) and has recently been the subject of a further study by Mr. F. W. Shotton (1935). The former authors considered the stratigraphy of the region, while Mr. Shotton has reviewed with the revision of the stratigraphy and the tectonics. Abstract The Cross customer mainly of Lower Palaeozoic rocks and is situated on the eastern side of the Vale of Eden. It was first described in detail by Nicholson and Marr (1891) and has recently been the subject of a further study by Mr. FW Shotton (1935).
